April 22, 1966

Mr. T. Nelson
Systems Consultant
Box 1546
Poughkeepsie, New York 12603

Dear Mr. Nelson:

Thank you for your recent inquiry concerning our new electrostatic console copier, the Copia II.

The Copia II introduces new and exclusive customer benefits never before combined in one moderately priced unit.

The Copia II, copies anything, in any color, (even half-tones), from individual sheets, to pages from bound books, cut to the size of the original from 8 1/2" x 6" to 8 1/2" x 14", without reloading paper, operational interruption and without waste. You can load enough copy paper for 2,000 letter-size copies, and enough toner for 10,000 copies.

First phase marketing of the Copia II will begin during mid-spring in selected markets. Meanwhile, we have asked our local representative to provide you with any additional information you may require.

A folder further describing the Copia II is enclosed.

We trust that a Copia II will go to work for you during 1966.

Sincerely,

R.S. Blumberg
